Join us for our 2010 tour:

Colorado Chickens and much more!

April 15 - 25, 2010

Join Sunrise Birding on an exciting tour that will include majestic mountains, waterfowl-covered reservoirs, riparian river valleys, expansive grasslands, arid deserts, and everything in-between. Colorado is famous for its 'chicken' specialties and we will aim to round up all of these alluring birds. There is so much to see in Colorado and our itinerary includes opportunities to see a wealth of mountain specialties, grassland rarities, migrants from both east and west, five species of grebes, and a clean sweep of North America's beautiful bluebirds. This trip will offer wonderful scenic memories, from mountain passes to sweeping grasslands as well as the astonishing birds that call these varied habitats home. It is a must for those with an eye to photography and those desiring to see a host of birds that are almost impossible to find most anywhere else in the country. As fair warning though, travelers must be aware that the tour includes some long, bird-rich, days as well as a good number of pre-dawn starts for the lekking chickens. Days will see us rise early, but the wealth of spectacular sights and species will be just reward.
